HVAC product line showcased at 2004 AHR Expo

Anaheim, Calif. – January 2004 – On January 26 – 28, the Anaheim Convention Center was the site of the largest West Coast Show, the 2004 International Air-Conditioning Heating Refrigerating Exposition (AHR Expo). Stik-II Products, a pressure sensitive tape manufacturer located in Easthampton, MA, was among 1,652 exhibitors who benefited from show traffic of more than 22,000 registered visitors. This year's event set records for both attendance and the number of exhibiting companies. Visitors attended from more than 100 countries and represented all facets of the industry including engineers, distributors, wholesalers, contractors, architects, OEMs, plant operators and facility managers.

The AHR Expo has been the Heating, Ventilation, Air Conditioning & Refrigeration professional's resource for innovative products and services for almost 75 years. At January's show, Stik-II Products first unveiled the company's new expanded product line for the HVAC industry.

In addition to their foam tape line that includes polyester and polyether open cell foam tapes and neoprene, polyethylene and PVC closed cell foam tapes, Stik-II Products offers specialty tapes and sealants. Butyl tapes, duct tapes, foil tapes and Very High Bond Acrylic Tapes provide water-tight bonds and weather resistance for optimum sealing and sound and vibration dampening. Polyurethane and silicone sealants offer permanent seals against moisture, dust and air for joint sealing while rubber extrusions are also available for door gasket and sealing applications.
